

Kindergarten teacher in a natural setting, Waiheke Island

At Fossil Bay School and Kindergarten we have kindness, creativity and focus at the heart of our work.

We provide kindergarten and primary year education, based on the modern Rudolf Steiner curriculum,

that is unhurried, screen-free and has small class-size as a priority. From that we observe the following

benefits: relaxed, low anxiety children; agile, future-ready minds and strong academic outcomes.

Our magical festivals bring the community together in a very special and unique way and our link to nature is evident in our environment. The kindergarten sits in a rural setting but still within walking distance of the main township on Waiheke Island which is, according to Lonely Planet, one of the world's

most beautiful islands only 40 minutes from Auckland city. For a glimpse of life at Fossil Bay we invite you

to look at the film featured on our website (www.fossilbay.co.nz).

Our kindergarten is looking for a proactive and enthusiastic teacher to join the friendly team. Having experience in Steiner education will count as an advantage but is not a requirement for the teacher with

the right heart and experience. NZ teaching registration is required, unless the candidate is a student in

their third year of teaching education.

Please don't hesitate to contact us for more information. We look forward to hearing from you.

Please

include a cover letter and CV in your application.
